

Hödlmayr International is an internationally active family business and specialist for Automotive-Outbound-Logistics. With our comprehensive range of services we can accompany our customers along the value supply chain. To strengthen our path to grow, we are now searching for an

International Trainee (m/f) Focus Controlling / Finance

HÖDLMAYR offers dedicated and career orientated graduates the possibility of entering professional life with a trainee programme.

The highest goal of the trainee programme for us is to create a pool of potential junior management employees for the whole group. As a trainee you are required both to get to know our operations and to participate in implementing our company strategy.

Over a year and a half we will prepare you intensively for your role as a junior management employee, whether it is in Schwertberg or in one of our Eastern European branches. Our motto is „Learning by Doing“ and therefore during this time you are predominantly responsible for current projects which correspond to your interests and the focal point which is derived from this (e.g. controlling, sales, etc.). Additionally, you will get to know our company processes and sequences and will be given the best possible preparation for your future in our company through individual training. The trainee programme is rounded off by a several month stay abroad in one of our branches where you will be able to demonstrate your intercultural abilities.

The importance of our trainee programme is emphasised by the high demands on our candidates. If you have a degree (ideally in business management or logistics) and a strong international aspect and have business fluent German and English, then you are already bringing the best qualifications with you. A further (Eastern) language would be advantageous but not essential. Personally you should distinguish yourself with your analytical and solution orientated working style and count communication and assertiveness amongst your strengths.

If we have awoken your interest in this challenging position, we look forward to receiving your application!
